The Sort of People that One Meets at Dances-

Who thinks the world all roses, Who loves at sight the first man who proposes Believes that each admirer is sincere. And cannot bear that men at love should sneer

HE NEAT YOUNG MAN. With high well-starched collar, And expectations! Ready cash, a dollar; Who dances like a well-made dance-machine, And wears a most depressed indifferent mien.

FRE KNOWING GIRL Who's waitzed through several sessons, Not married yet? But then she has her reasons Who's always dressed with chic that makes girls To please her partners this one is most zealous.

The Man or Years,
No longer pleased with folly,
Who thinks that dancing's good, but supper's jolly; Prefers to spend his time in conversation, With perhaps, to sweeten it, the least firtation.

THE CLEVER GIRL, Who's great on education, Whose talk is lofty and of long duration; Who scorns frivolity, neglects her clothing. Loves Women's Rights, and looks on men with

loathing. THE NERVOUS MAN, Who stands up in a corner, The very image of a new Jack Horner : The sort of man who asks, (whilst shyly glanc-

ing At his fair partner), "Are you fond of dancing?" HE PRETTY GIRL, Of whom men ask, "Who is she?" And women murmur that she's far too gushy;

Of whom few guess, who meet her winsom

She has a heart, a thing apart-from dances. THE TAME YOUNG MAN, Who talks about the weather, And hopes your step and his go well together, Agrees to every single word you utter, Can't dance a bit, and then begins to stutter.

HE ANXIOUS GIRL. 'Not been out much before." But very willing to go out much more ; Who, when she's asked to dance, looks very grateful,

Likes grown-up men, and thinks that boys are hateful. THE FLIRTING MAN, Who falls in attitudes. Talks to each girl of love—in platitudes; Looks ling'ring looks which seem to breather

And doesn't feel, himself, the least emotion THE FAST YOUNG MAN, Who drops in for an hour,

Who generally wears some large white flower; Who quotes from comic songs, and smells And has a great propensity for joking. THE CHAPEBON, Who sits with smile so weary, To her a dance must be a thing right dreary;

Who beams upon young men with lots of money For poor young men her looks are not so sunny. THE GENERAL CROWD, The average man and maiden, With never too much brain or beauty laden;

Miscellaneous Items.

But he will see, who at these lines once glance

The sort of people that one meets at dances.

A Newspaper Dog .- "Don't you want to buy a dog?" said a dilapidated individual dragging an ungainly and unwilling cur into the office with a rope. "Don't say no, now, until I tell you something about this fellow. He's a born newspaper dog. He don't want nothin' better than to lay around a newspaper office and nip the leg of a printer that he catches soldiering. He hates book agents, pedlars, end poetesses, and he can tell 'em on sight. As for feedin' him it won't cost you a cent. He's never had much experience in eating, and if you'll just chuck him a roll of rejected manuscript, with a little poetry thrown in for dessert, it 'll satisfy him just as if you'd given him a bone. He used to belong to a steamer ever built on this coast and she has friend of mine that run a little newspaper up the country a piece. One day the dog was left in the office with the week's papers just after they had been run off the press. The dog was pretty hungry; he hadn't had anything to eat for two or three days, and although he had always been perfectly trustworthy before, his appetite got the better of him, and he eat the whole circulation before my friend got back, and that's the way I came to get him, for my friend turned him over to me on the spot. Don't want him? All right, you'll be sorry for this. Here, Typo!" But Typo didn't go. While his master was talking tons register, to be built in this port: his he had eaten a copy of the Meriden Recorder, and

THE NEW NORTHIWEST-ATLANTIC SLOPE.—Some striking facts concerning the development of the New Northwest are presented in an annual re-port of the St. Paul (Minn.) Chamber of Commerce for 1881. The city embraces about 20,000 acres of land, surveyed into lots, and has a river front of three miles. It has a population of about 65,000. In 1881, 1161 new buildings were erected at a cost of \$4,571,700. The bank deposits have arisen from \$6,592,231 in 1880, to \$11,112,074 in 1881. In 1870, the sales in the wholesale trade amounted to the sum of \$9,813,-000; in 1878, to \$31,913,800; in 1881, to \$61,232,047. In 1878, the number of employes in the wholesale trade was 1825; in 1881, 3000. In 1878, there were 233 manufacturing establishments, employing 3117 persons, with \$6,150-000 aggregate value. In 1881, there were 792 establishments, 8937 employes, and an annual production to the extent of \$16,071,535. There were employed in the business represented by St. Paul firms, 1473 men. During the year, \$568,816 were disbursed for public improvements.

THE BRITISH SOLDIER'S STOMACH.-The naval officers who visited the camps between Ismailia and Kassassin have been filled with a profound and pitying conviction that some most distinguished corps are not fit to take care of themselves in regard to food and supplies. It is certain that the British stomach, when borne on a soldier's legs, needs a deal of looking after. If the owner fills it, he never thinks it can be empty again, and flings away his extra proviant. Sometimes he puts two days' rations into it; sometimes he uses only one day's ration, and, feeling pretty comfortable, throws the next day's supply away, and and Transport,-Army and Navy Gazette.

delivered judgment in an action brought by a betting agent, to recover £175 which he had paid in bets, lost for the defendant who ter refused to acknowledge the bets, and alleged that he had by custom a right to do so, as he had not received a return telegram judgment for the amount.

to the agency of the life-saving stations.

A Michigan lumbering company is making barrels by cutting a log into barrel lengths. softening them by a steaming process and then shaving each piece into a long sheet, unrolled like a carpet. Each sheet is then estimated that fifteen tons of "the disgusting crosscut into such a length that when the two ends are brought together it is given the the course of every year. A little more size and form of a barrel, without heads, the than twelve months ago there was a marked whole being done by machinery. This has reduction in the consumption of the stuff. proved a great improvement over the stave after its denunciation by the Catholic barrel in cost of manufacturing as well as in Bishop; but the factory girls now treat the merits for use. The only drawback is that clear timber is required, all the knotty timber being rejected.

The French Homes of the Rothschilds.

The chateau of Ferrieres, where Baron Alphonse de Rothschild has been giving a series of entertainments in honor of the Comtesse de Paris, bids fair to outdo Beaure-

gard for the magnificence of its fetes. The Rothschilds possess upon French soil as many fine mansions as were formerly KALE and GLENGABER. possessed by the monarchs whose veins were coursed by the blood of the Valois. Saying nothing of the houses of the family in Paris, the mor prominent of these residences may be mentioned. There is, to begin with the, splendid Abb-y of C rnay which has been transformed into a modern castellenie by the Baroness Nathaniel.

which the unfortunate Baron James Edward was having erected in the shadow of the house of the Condes at the time of his sudden and tragic death, and which has since been completed by his widow. Next comes the chateau of Bologne, bought by the Dowager Baroness de Roths-

Then there is the mansion of Chantilly,

nificence which is only equalled by that of her own villa at Cannes. The Baroness Adolphe holds her plenary court in the early days of autumn at the charming little villa of Pregny, on the shore

child, and to which she has imparted a mag-

of the blue Lake of Geneva. Lastly, there is Ferrieres, the residence, destined to pass from generation to generation to the eldest son of the house of Rothschild in France, in order that he may there maintain a sovereign pomp as chief of the dynasty. All the Rothschilds are at home there, and are treated like kings. There are no such things as "invitations" or Noyeau, "visits." Flanked by four towers, Ferrieres in its architecture recalls Windsor Castle Both are composed of different buildings belonging to different periods, and present an amalgamation of all the styles that have prevailed in past generations. Ferrieres is comfortable as well as luxurious. The writer of this sketch in the French paper mentions, for example, that a little tramway is laid in the passage of the kitchens, and is worked by steam to take the dishes to the

Court otiquette reigns among the company at Ferrieres. The ladies dine en toilette decolletee, the gentlemen in swallowtails and white ties. Ferrieres is a centre for all the distinction of the world. Entirely adopted by the Fauburg St. Germain, the Rothschilds receive the cream of society. The Prince of Wales never goes to Paris without accepting an invitation to Ferrieres.

Good Shipbuilding.

The Hawaiian screw steamship Likelike, owned by S. G. Wilder of Honoluiu, was built in San Francisco Bay some six years ago by Dickie Bros. The machinery was BEERS furnished by the Risdon Iron and Locomotive Works of San Francisco. All these years the Likelike has been in active service, encountering rough seas and often the stormiest weather known in the Pacific in That can be procured on the face of the channels between the Islands, and has never until now been on a dock or been taken out of the water. Though vessels foul more rapidly in the inter-island trade than on this coast, and it is impossible that sometimes that she could not touch a coral reef, the Likelike has never been cleaned or had any repairs done to her hull below except by divers, When the Likelike was launched, she was the largest sea-going proved both profitable to her owner and creditable to her builders. We had an opportunity while in Honolulu last month of seeing the Likelike taken out of the water by Wilder's marine railway and stripped of her copper. With the exception of a slight injury to her stern, keel and sternpost, and half a dozen places the size of rat holes, she looked as sound as when built. prepare plans for a new steamer of 900 tons register, to be built in this port; his present fleet of steamers being inadequate in tonnage or number to carry the rapidly increasing inter-island freight and travel traffic .- S. F. Merchant.

Another Great Central African Lake.

The existence of another equatorial lake in Central Africa, far to the west of Albert Nyanza, rumors of which have reached Europe from time to time since Sir Samuel Baker's first journey, is again reported. Mr. F. Lupton. Governor of the Egyptian pro-vince of Bahr el Ghazel, writes from his station, Dehm Siber. on the 27th July, to the effect that Rafai Aga, a servant of his, on his return from an expedition towards the Welle, told him that he and some of the members of the expedition had seen a great lake in the country of the Barbon, a powerful copper-colored tribe, clothed with a peculiar grass cloth (of which Mr Lupton sends a specimen in his letter). Mr. Lupton gathered that the position of the lake was in about 3 deg. 40 min. N. lat, and 23 deg. E. long., and that it was quite as large as Victoria Nyanza. When the weather permits, the Barboas cross the lake in large open boats made out of a single tree, the voyage taking three days; and they obtain from the people living on the western side (their own country being east of the lake) articles of European manufacture, such as blue beads and brass wire. Mr. Lupton adds Rnfai Aga's own account of his route to the lake :- Started from Dehm Bekeer, marched six days south-west to Zeriba el Douleb. then, being hungry, d-s the Comissariat then four days south-south-west to Bengier; four days south-west to Keriba Warendema; six days south-west by west to the Bahr el In London recently, Mr. Justice Hawkins Makwar, which he crossed after visiting several very large islands inhabited by a people who called themselves Basango. The Makwar is called by the Arabs Bahrel to purchase had sent him instructions by telegraph to Warshal, and joins the Welle, but is a much make the bets. He had afterwards by let- larger stream; both flow in a west-southwest direction. After crossing the Makwar Rafai marched ten days south-south-west. and reached the residence of the "Sultan" of sent within a quarter of an hour of the con- Barbon, by whom he was well received; the clusion of the race. Mr. Justice Hawkins lake is situated four days' march to the decided against such a custom, and gave south-west of the Sultan's residence. Mr. Lupton concludes by saying, "I feel I should saving service to all portions of the Atlantic | petent persons, may throw some light on coast in 1876, the loss of life from marine the famous Congo and Welle Rivers. I disasters has been reduced nearly 75 per | believe that the Welle flows into the lake cent.; that is, that while in 1876, and prior discovered by Rafai Aga, and that the For Prices, Cuts, Etc. to that time, one person was lost in every 29 | stream which is said to flow out of the lake on board vessels suffering disaster, there has | probably joins the Congo." Mr. Lupton is been a constant decrease until now there is | engaged in preparing a map of his province, but one person lost out of every 113; and and was about to start in a few days on a the result is shown to be almost entirely due | journey to a country called Umbungu, some fifteen days' march to the west of Dehm
